

FAASTeam presents:

Crew Resource Management and Getting the Most From Aircraft Performance Charts

This segment will focus on demystifying the performance charts as an aid to decision making. Too often we rely on vague memory or guestimates regarding what we can expect from our airplanes and may end up as an NTSB statistic. Paul Beaulieu will convince you that these charts are friendly and usable and will give you the information you need for good decision making. In the 2nd segment Ken MacDonald will discuss Crew Resource Management as it applies to single pilot operations. We will discuss the history of CRM, why accidents happen and how you can benefit from this information. Click on the link below and register TODAY.

Directions: Take I-95 to exit 57 Ma-113 toward Newburyport. Follow Storey Ave. It will turn slightly right and become High St. Turn left at Rolfes Lane/Ocean Ave. Turn right at the end of Ocean Ave. on to Plum Island Turnpike. The airport will be on the right.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
