

FAASTeam presents:

Mastering the Art of Instrument Navigation - Radio Communications

IMC Club, through its nationwide chapters, provides organized “hangar flying” focused on building proficiency in instrument flying. Believing that safety and proficiency are developed through education and experience. Monthly meetings use real world scenarios to engage our members and allow them to share and build their experience. You do not have to be instrument rated to attend. Click on the link below and register TODAY.

LiveATC.net has grown over the last 12 years from a small “collision of hobbies” experiment to the world’s largest network of ATC receivers. In this presentation Dave Pascoe will share the history of LiveATC.net and how the system works. He will also explain how it is used in flight training, accident investigations, in news reporting, and for general entertainment. Dave will also explain how you can help expand the network and how you can benefit from using it to review your communications with ATC after every flight. Finally, Dave will share a few tips about other online flight training resources that he finds valuable, as well as some pointers for communicating effectively with ATC.

Directions: Upstairs conference area, main FBO building
