

2015 Northeast Experimental Fly-in

Aircraft must have Automatic Dependent Surveillance Broadcast (ADS-B) capability in certain U.S. airspace after December 2019. This seminar will discuss how ADS-B works, who needs to equip, and what equipment options are available based on the current state-of-the-art. See additional info below.

Directions: This meeting will be held in Hangar #1 (The far left, white hangar). No GPS address for airport GATE 4, so when near 400 Holt Rd., follow the EAA signs. Ideally, please arrive between 9:00-10:30 when we will have someone manning the gate for entry. Outside those times, please call the number on the paper taped to the yellow post for someone to come let you in.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
