

FAA Safety Team presents:

Obstacle Departure Procedure (ODP)

You are preparing to depart into a low overcast from an unfamiliar airport when Center asks “November 1234 Fox, can you maintain your own terrain and obstacle clearance through 6700?” If you aren’t sure how to answer, you are not alone. Many IFR pilots have a poor understanding of the requirements, procedures and best practices necessary to confidently plan an instrument departure particularly when there are obstacle departure procedures published. In this seminar, we will show you how to do this confidently and safely. By reviewing scenarios and examples of challenging departures, you will learn about diverse departures, ODPs, SIDS and more. We’ll also discuss how to anticipate and deal with emergencies that might arise in the early phase of an instrument flight.

Directions: EAA Pilot Proficiency Center
AirVenture 2016

Venue Location: Four Corners (Knapp Street & Celebration Way). Across from the EAA Membership Pavilion

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASteam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the “Contact Information” area of the meeting/event notice. Note that two weeks is usually required to arrange services.
