

FAA Safety Team presents:

Navigating Different Airspace Types

Nathan Kurth's love for aviation started as a kid watching A-10s near his home and continued over the years by attending air shows and building model airplanes. He has been flying for 15+ years and has logged more than 1,600 hours of flight time. Nathan has a degree in Aerospace Science and holds commercial, multi-engine, instrument and single-engine land ratings. Over the course of his 10-year Jeppesen career, Nathan's roles have included FAR/AIM, ARINC, 424 coding and Department of Defense terminal procedures. This session will help you understand some of the nuisances of different air space and how to safely navigate through or around them.

Directions: EAA Pilot Proficiency Center

AirVenture 2016

Venue Location: Four Corners (Knapp Street & Celebration Way). Across from the EAA Membership Pavilion
