

FAASTeam presents:

Speed to Fly Theory - What Is It and Why Should I Care?

While on glide, a pilot's two most important performance-related decisions are how fast to fly and in what direction. This webinar discusses the former. Toward that end, it discusses classic MacCready speed-to-fly (STF) theory, how to use your STF-capable flight computer, when to temper or even ignore STF theory, and final glide. Even the best pilots never know for sure (till perhaps after they've landed) whether they were flying the optimum speed at any given time!

Directions: Please register for "Speed to Fly Theory - What Is It and Why Should I Care?" on February 19, 2019 at 8pm EST at the following link:

<https://register.gotowebinar.com/register/135134773590228739?source=FAA+WINGS>

After registering, you will receive a confirmation email from CITRIX/Go-To-Webinar containing information about joining the webinar.

Upon registration, you will receive an email with the link to be used on the day of the event. WINGS credit will be awarded based upon the email used in the registration, so please use the same email address to register that you also use for WINGS.

We look forward to seeing you.

Registration on FAASAFETY.GOV is not required.

There are 500 virtual seats. You need a computer or telephone to attend.

Seats are limited to 500 and fill up fast so REGISTER TODAY!
