

FAA Safety Team presents:

Aviation Weather Sources

With the wide-ranging availability of weather information, general aviation (GA) pilots continue to find themselves surprised and trapped by adverse weather environments? Ironically, the very wealth of weather information might be part of the answer. There are many weather providers and weather sources and it can be challenging for pilots to screen out non-essential data, focus on key facts, and then correctly evaluate the risk resulting from a given set of circumstances. Learn what is available and how to use it efficiently.

Directions: EAA Pilot Proficiency Center
AirVenture 2019
Venue Location: Four Corners (Knapp Street & Celebration Way), across from the EAA Membership Pavilion. Click here for more information.
