

Building Your Own Kit Aircraft

Have you ever wondered what's involved in building your own aircraft from a kit? In this three hour free workshop, you will learn about the planning, kit selection, building, documentation, inspection, repairing, flight testing, and operating your "homebuilt" (aka E/A-B, Experimental / Amateur-Built) kit aircraft. We'll print some extra sets of handouts, but to ensure we have a handout for you, please register by Thurs, June 27.

Directions: No GPS address for airport GATE 4, so when near 400 Holt Rd, follow the EAA signs. Please arrive between 9:00-10:30 when we will have someone manning the gate for entry. Outside those times, please call the number on the paper taped to the yellow post for someone to come let you in. MAP LINK: www.106.eaachapter.org/ourhangar.htm

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
