

Proficiency Matters 1

Preparation is the key to success in any endeavor! At this seminar we will discuss a long VFR summer cross country trip. We will examine how preparation, along with recurrent training and proficiency made the difference to the pilot who made it to the ground safely after the engine quit!

Attend this seminar and discuss what decisions you would have made if it had been you! Prior to attending a safety seminar please review and abide by current CDC, State and Local health guidelines.
