Be a Better Volunteer Pilot !

Pilot operation considerations are numerous requiring diligent regular review especially given the variety of volunteer flight types. The considerations for safely flying a child facing challenging medical outcomes are quite different than flying endangered turtles to rescue facilities.

This webinar will help both existing and potential volunteer pilots of all types to identify both basic and advanced considerations and actions to assure that the charitable aviation community continually strives to share best safety practices.

We will also address FAASTeam 2025 goals including Safety Management System (SMS) and Human Factors.
