FAASTeam presents:

# Interactive Instrument Flight Procedure Development Session Featuring an IFR Chart Clinic

## Event Details

Join us for an interactive session that guides participants through development, implementation, and commissioning of Instrument Flight Procedures. (IFPs). We'll explore the four essential elements of ongoing procedure maintenance and walk through the full certification pathway for Runways, Heliports, and Vertiports - including night operations and how Hughes secures an official FAA LOCID (location identifiers) for an aerodrome.

Participants will learn how Hughes evaluates Runways/Heliports, categorizes obstacles, engineers airspace, completes the Environmental Process, and conducts Flight Inspection and Validation activities. The session also includes a detailed look at VGSI (visual glide slope indicator) commissioning and maintenance, including PAPI (precision approach path indicators) and VASI (visual approach slope indicators) systems.
