

Whats Involved in Building Your Own Kit Aircraft

Have you ever wondered what's involved in building your own aircraft from a kit? In this 2-1/2 hour free seminar, you will learn about the planning, kit selection, building, documentation, inspection, repairing, flight testing, and operating your "homebuilt" (aka E/A-B, Experimental / Amateur-Built) kit aircraft.

No GPS address for airport **GATE 4**, so when near 19 Holt Rd, North Andover, MA, follow the EAA signs. Ideally, please arrive between 8:30-10:30 when we will have someone manning the gate for entry. Outside those times, please call the number on the paper taped to the yellow post for someone to escort you in.

A message from the National FAASTeam Manager
