FAASTeam presents:

Frozen in Flight - The Dangers of Icing

Join us for "Frozen in Flight", an essential aviation safety seminar focused on the critical hazards of atmospheric icing. This session will explore the physics of supercooled liquid water, the structural and aerodynamic risks posed by rime and clear ice, and the aircraft de-icing capabilities available to pilots. Attendees will also gain practical insights into preflight risk assessment, tactical decision-making, and emergency escape protocols when operating near or within known icing conditions.

Driving Directions: When entering the parking lot, look for the **University of Mount Olive** sign on the main building.Head inside the building; the meeting will be held directly in the hangar.

Google Maps Directions

Flying-In Directions: Park on the main ramp, then walk straight between the large hangar and the brick building. The flight school will be located immediately on your left.
