

Tailwheel Tips and Tricks

It is said that when “flying” a tailwheel airplane you are not done flying until the engine is shut down and the tiedown ropes are attached, and we will attest to that. Some of the most important lessons to be learned in a taildragger are those lessons on the ground, especially when the wind is blowing. Learn from two of the best in the business of tailwheel instruction.

Directions: The Learn To Fly Discovery Center is located on Celebration Way, just south of EAA's Welcome Center on the AirVenture grounds
