**(203) 910-4955**  
[info@aerblarney.com](mailto:info@aerblarney.com)

Select #: EA6345805  
Representative MICHAEL PATRICK MURPHY

Radio communications are essential to safe aviation operations, regardless of whether you are communicating with ATC or operating at non-towered airports. This program will address radio communications for balloon pilots, however, **ALL PILOTS ARE ENCOURAGED TO ATTEND!** Attend this exciting interactive ground training program which will feature active participation from attendees using hand held radios communicating with a simulated tower! This exclusive program will provide practical knowledge that you can use to effectively communicate with anyone in the National Airspace System! Please see important details in the "Additional Seminar Information" section of this announcement.

**Directions:** CT-61, "South Street" to Town Line Road, proceed 1 mile West, turn right on Hard Hill Rd. If you plan to fly in, please call Mick Murphy at 203-910-4955.

### **A message from the National FAASafety Team Manager**

Over 10,150 AMTs earned an AMT Award last year. Will you, this year?
