

Can an iPad Really Save Your Life?

Attend this exciting event featuring two briefings! At the first we will discuss general aviation takeoff, approach and landing accidents and how best to prevent them. We'll also address operations at tower controlled airports and discuss if pilots are always obligated to follow ATC instructions? The second half of the program will examine the way technology is changing the way we fly. Many pilots are flying with an iPad in the cockpit but still purchase and carry paper charts. Is it considered "safe" to fly with just an iPad? Refreshments provided by Worcester Area Pilots Association!

Directions: Briefing upstairs in the airport terminal building.

A message from the National FAASafety Team Manager

Over 10,150 AMTs earned an AMT Award last year. Will you, this year?

Sign up for the FAA's safety services at www.FAASafety.gov!
