

Into the Darkness...

Do you fly at night? Are you aware of all the night flying hazards. Night visual illusions and reduced visibility can be threats to spatial orientation, navigation, weather avoidance and obstacle clearance. They can also impact takeoff & climb and approach & landing operations, as well as airport ground operations. How about cross country planing... should you do anything different? Featured presenters for this briefing include FPM Jim Adams and FAASTeam Reps. Ken MacDonald and Jack Keenan. Jim will review a recent night accident and discuss how it could have been prevented. Don't miss it!

Directions: Program held in the airport terminal building. Free parking. Visit the map link for directions.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area
Sign up for the FAA's safety services at www.FAASafety.gov!
