

The FAA Safety Team presents:

Avionics Gone Wild!

Whether it's a calamity of wrong button pushes or a subtle input failure to a glass panel, understanding the avionics and automation interface in the aircraft you fly is fundamental to safety! During this informative briefing featured speaker Larry Anglisano will discuss choosing the best avionics for your mission, ensuring you have all of the necessary back up systems, the importance of model specific avionics training, when to use an autopilot, Electronic Flight Instrument System (EFIS) failures, FAA Paperwork and the pros and cons of using an iPad. Refreshments provided by Oxford Flying Club. Thanks to Naugatuck Valley Community College (NVCC) for hosting this exclusive briefing. Click on the link below to learn more and register today!

Directions: From I-84 take Exit 18 to the Chase Parkway, enter the campus, follow the signs.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
