

FAA Safety Team, EA-63 FSDO presents:

FAASTeam Flight Instructor Open Forum

The startle reflex normally triggers within 100 milliseconds stimulus, it is pre-emotional and contains physiological and subjective dimensions. In the jungle, this is the fight-or-flight response when encountering something unexpected. A pilot's response to this stimulus can often mean the difference between life and death! So, how do you teach your students to Prepare for the Unexpected? At this FAASTeam CFI-DPE Open Forum we will explore some of the unexpected conditions that can happen during flight and how you can teach your students to be prepared to cope with these situations. Loss of Control will also be presented and discussed. CFIs, Ground Instructors, D P Es, and Instructors in training are welcome and encouraged to attend. Click on the link below and register TODAY!

Directions: The hangar is located at the North East corner of the airport property. If inclement weather is forecast for the seminar time, call 860-654-1039 for a status message.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
