

Unusual Attitudes

Are you intimidated by steep turns and stalls? Would you like training to make you feel more in control of your aircraft, and more confident to handle emergencies such as: wake turbulence; partial control failure; engine failure; upset and spins; and off-airport landings? Unusual Attitude/Upset Training does just that—help pilots explore the characteristics of aircraft flown outside the normal attitude and stability envelopes. You may only get one chance when you find yourself in such a situation. Pizza and soda after the seminar, provided by Berkshire Aviation.

Directions: Take Rt 7 to Rt 41-23 to Rt 71-Egremont Plain Rd. Go 1 mile west to the airport. See map link.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
