

EA-63 FSDO, FAASTeam presents:

Great Barrington Airport 4th Annual Fly-In and Wings Seminar

Come and learn from a seasoned career professional corporate pilot. Ken MacDonald will explore the techniques of reading the weather either on board or during preflight. Watching the radar and their trends and determine which direction to fly and what to avoid. Learn how to read and fly safe in ugly weather situations. Prior to on-board weather a pilot would need to review weather trends and interpret what the trends were and determine in what direction weather is moving. Will you be in the way? What are your options? What do you do? Learn from someone who can provide invaluable insights and relate some of the techniques which can be used by VFR and IFR pilots alike. Staying out of IMC without an instrument rating is critical. Attend this exclusive seminar to learn how. Advise parking attendant you are here for FAA Wings Seminar and you will not be charged for parking. You should print a copy of this announcement and bring it with you.

Directions: See map link at faasafety.gov If you are flying in, please check NOTAMS for runway closures.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
