

Aircraft Systems and Emergencies

Understanding the systems specific to the aircraft you fly can give you peace of mind, as well as save you in an emergency. This seminar will explore all of the common aircraft systems, fuel, electrical, control systems and some of the lesser-known systems (pitot-static drains, emergency avionics switch) in the Piper Cherokee-series (PA-28) aircraft. This information will then be demonstrated how it can be put to use during various in-flight emergencies, or even to prevent the emergency from occurring in the first place. This seminar is focused on the PA-28, much of it is also applicable to other aircraft. This seminar is hosted by Silver City Flying Club. Click on the link below to register TODAY!

Directions: The Old Firehouse is located just off Rt. 372 / Main St. Note: seating is limited.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
