

What Can A Power Aircraft Pilot Learn From A Glider Pilot? & Laser Lights And Pilots

In Part one of this FAASafety Team Seminar, Avid Sailplane Pilot Pieter Schwarzenbach will show us some techniques to help us powered pilots get down safely and make a successful dead stick landing. Remember all glider landings are power off with no possibility of a go around. Glider pilots make successful landings on and off airports every day. In Part two of this seminar, Pieter, who holds a doctorate degree and is an expert in the laser industry will discuss the laser hazard to pilots. This should be a very interesting seminar; be sure to bring your questions. If inclement weather is forecast for the seminar time, please call 860-654-1039 for a status message. Click the link below and register TODAY.

Directions: I-84, to CT-72 West, exit at CT-177, turn Rt on N. Washington ST. go 1/2 mile turn Rt. on to Johnson Ave.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
