

The FAA Safety Team, EA-63 FSDO presents:

NTSB Safety Seminar on Air Traffic Related Aircraft Accidents

Change: Seats Added

Changes: Seats Added. The National Transportation Safety Board is presenting a seminar regarding air traffic control in the general aviation environment. The NTSB has partnered with the Federal Aviation Administration (FAA) for this useful and educational seminar. Attendees will have the rare opportunity to hear from local FAA Air Traffic Controllers, who will discuss policies and procedures which are important for pilots to understand while navigating through one of the most complex and busiest airspace locales in the Washington DC Terminal area. They will also discuss phraseology and communication procedures for pilots to be able to navigate the local airspace with ease. NTSB Board Member Earl Weener will be a featured presenter, and attendees will also hear from NTSB Investigators who have investigated accidents involving air traffic control. See the additional information to do the two part registration for this event.

Directions: Directions to the NTSB Training Center are available at the following link:
