

Pilot Proficiency and Cockpit Management

Through high profile accident review we will see how pilots can substitute complacency and ego for proficiency and safety. Proficiency in flying skill is stressed but also addressed is the need to constantly review aeronautical decision making, workload and automation management. Tips for methods to stay current are offered as well in addition to the minimum requirements of three takeoffs and landings every ninety days. Don't miss this event. Light refreshments provided by Interstate Aviation.

Directions: From the east and west take Interstate 84 to exit 33 (Rt. 72) to exit 1. Go north on Rt.177 to Johnson Ave (right turn). Airport access road is to the right before the dead end. Interstate Aviation phone 860-747-5519.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
