

WINGS SEMINAR

APRIL 16, 2016 10AM

KBAF AIR 1 FLIGHT TRAINING

WESTFIELD, MA

413-729-9000

Pilot Proficiency and Cockpit Management

Through high profile accident review we will see how pilots can substitute complacency and ego for proficiency and safety. Proficiency in flying skill is stressed, but also addressed is the need to constantly review aeronautical decision making, workload and automation management.

Tips for methods to stay current are offered as well in addition to the minimum requirements of three takeoffs and landings every ninety days. Don't miss this event.
