

Worcester Area Pilots Association - Preventive Maintenance

Did you know there is certain maintenance you can legally perform on your own airplane without being an A&P? Join me as I discuss the requirements, duties, documents and conditions that apply before you start turning wrenches. 14 CFR Part 43 Appendix A(c) lists what you can do, but before you pick up your toolbox and head to the hangar, we'll talk about how to satisfy the regs while giving you the knowledge of how to proceed safely. There's more to understanding the what, why, when, and how than always meets the eye. This seminar aims to help you with that understanding.

Safety Seminar will be held in the baggage claim area of the terminal. Free parking terminal lots. Coffee and snacks will be provided.

Prior to attending a safety seminar, please review and abide by current CDC, State and Local health guidelines.
