

Meriden IMC Club Monthly Meeting at KMMK

Is that spring in the air? Please come to the **March 2026** meeting of the IMC Club, an affiliate of the **EAA**. At this meeting, a new instrument flying scenario will be presented pertaining to a night IFR flight with an engine failure near the destination airport. After listening to this real life scenario and after discussion with the group, it is the hope that the attendees will learn and do the following: evaluate all available options in a real-life crisis situation, as well as through pre-flight planning to anticipate engine failure at night. This scenario allows the attendees to share and build on their own experiences. You do not have to be instrument rated to attend! We begin our meeting with the Question of the Month. Following the presentation, we will conclude with the question, "What would you do?". Refreshments will be served. Click the link below and register today!

Take Main St, CT-70, or Hanover St, to Evansville Ave.
