

Radio Communication - Standard Procedures

Proper radio communication is essential for safe and efficient use of the National Airspace System. Thousands of aircraft are operating on the ground and in-flight at any given moment. Accordingly, it is incumbent on all users – pilots, controllers, ground station operators alike – to correctly communicate with one and other. During the seminar, we will review proper technique, phraseology, read back requirements and other key aspects of proper radio transmissions.

Avia Flight Academy is located in the same building as Atlantic Aviation North. Parking is also shared. Enter through the door with the Avia Flight Academy awning.
