FAA Safety Team and the Bradley FSDO presents:

Meriden IMC Club Monthly Meeting at KMMK

It is almost time for Thanksgiving, but we will continue to talk TURKEY at the **November, 2026**, IMC meeting of the Meriden IMC Club, an affiliate of the **EAA**. At this meeting, a new instrument flying scenario involving a decrease in fuel flow during climb, as well as a decrease in manifold pressure, and decrease in cruise airspeed to just above 1.3 vso, will be presented and discussed. This scenario along with other current aviation news will allow the attendees to share and build on their own experiences.You do not have to be instrument rated to attend! We begin our meeting with the Question of the Month. Following the presentation, we will conclude with the question, "What would you do?". Refreshments will be served. Click the link below and register today!

Take Main St, CT-70, or Hanover St, to Evansville Ave.
