

You're Only Human!

It has been said that human factors play a role in all aircraft accidents. We will discuss the role that psychological and physiological factors play in the role of such leading accident causes as runway incursions, loss of control, and poor decision-making. We will analyze the "Dirty Dozen" human factors that are most commonly associated with accidents. Learn how to recognize and effectively deal with these factors in your flying operations.

Directions: See the "Additional Event Information".

A message from the National FAASTeam Manager

The new WINGS–Pilot Proficiency Program is great! Check it out now!

Sign up for the FAA's safety services at www.FAASafety.gov!
