

Are You Afraid of the Dark?

Do you fly at night? Are you aware of all the night flying hazards. Night visual illusions and reduced visibility can be threats to spatial orientation, navigation, weather avoidance and obstacle clearance. They can also impact takeoff & climb and approach & landing operations, as well as airport ground operations. The speaker for this briefing is John Wood, FAA Safety Team Program Manager. He'll provide the tools and training necessary for us to safely mitigate these night flying hazards.

Directions: I-95 to Exit 53. Left at light. At next light, take right onto Leighton Rd. Go to end and take right onto Falmouth Rd. Go past town hall and take first left onto Woodville Rd. Middle School is ahead on left.

A message from the National FAASTeam Manager

Over 10,150 AMTs earned an AMT Award last year. Will you, this year?
