

Sunny Side Up?

Spatial disorientation is the most lethal general aviation accident precursor, and affects both Visual Flight Rules (VFR) and Instrument Flight Rules (IFR) pilots alike. Attend this interesting and informative briefing and explore the events that lead up to these accidents. Featured speaker Michael Lessard will provide attendees with mitigation strategies that might just save your life! Participants will have an opportunity to take a "flight" in the vertigo chair! Join your pilot colleagues in increasing your level of safety! Click on the link below and register TODAY!

Directions: See "Additional Seminar Information" for directions.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
