

EAA Chapter 1210
Biddeford, ME

Come join us for a morning with FAASafety Team Representative, Michael Lessard

Spatial Disorientation – Sunny Side Up?

Spatial disorientation is the most lethal general aviation accident precursor, and affects both VFR and IFR pilots. Michael will guide pilots in discussion of the many faces of spatial disorientation and suggest practical strategies and tactics for coping with this acknowledged killer. In this seminar you'll learn how to identify potentially disorienting situations before it's too late. You'll also learn the most likely flight environments for spatial disorientation and how to avoid them. We will explore a 3D recreation of a spatial disorientation accident and if you wish...

You will have an opportunity to experience the effects of spatial disorientation in the Vertigo Chair!

This event is co-sponsored by the Portland ME FSDO, EAA Chapter 1210, and WINGsRealityEDU.com. There will be lots of great stuff to learn, door prizes, and friends! So come out and be part of the fun!

Saturday, 18 May 2013 → 10:00 – 12:00 noon
Fly in or Drive in! → Biddeford Municipal Airport (B19) → Biddeford, ME

As always, pre-registration on www.faasafety.gov is appreciated!
