

FAASTeam, Portland FSDO presents:

The Rest Of The Story

At this exclusive event, we will examine how aeromedical and human factors played a role in the JFK accident as we look at the case and examine the preflight, weather and flight conditions. We will explore aeromedical topics that affected the flight including spatial disorientation, night vision and fatigue, as well as look at other aeromedical conditions that affect pilot performance. Other topics will include hypoxia, hyperventilation, hazardous attitudes and potentially dangerous scenarios. The format will be in a case presentation style that encourages audience participation and we will discuss ways to combat and minimize risks associated with the above topics. Click on the link below to register TODAY!

Directions: Southern Maine Aviation is in the Main Terminal Building, next door to the "COCKPIT CAFE." There is parking for "Fly-ins" on the FBO east ramp. The seminar will be held in the SMA hangar.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
