

The ABCs of Airspace

What are the dimensions and operating requirements for the various classes of airspace? What are the weather minimums? How does a pilot find airspace boundaries on a sectional chart? And what about the odd stuff, the MOAs and MTRs and TFRs and SFRA? How can a pilot prepare for the cockpit workload change as he/she transitions from one airspace type to another? FAA Safety Team Representative Rob Montgomery will take you step-by-step through the details. Have your questions answered by an expert. Don't miss this exclusive event. Click on the link below and register TODAY.

Directions: I-95 to Route 33 west. At 2nd traffic light take a left onto Old Post Road. Go two miles to #682 Old Post Road (on right).

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
