

FAASTeam, Portland FSDO presents:

Don't Be Fuelish

During this Wiscasset Annual Chili Cookoff and Safety Seminar, come learn how to be proactive in fuel management and avoid becoming a statistic. Sailplane pilots and space shuttle pilots are trained to execute normal landings without power. However, powered aircraft pilots normally have the option of a go-around, except, when they run out of fuel! At this exciting safety briefing we will examine a fuel management and how to plan properly during preflight. Registration will begin at 9:30, and fresh, hot coffee will be available. The seminar will begin at 10:00 and run approximately two hours. It will be followed by the annual Chili Cookoff. Awards given for Best Chili, Best Vegetarian Chili, and Hottest Chili. Click on the link below and register TODAY.

Directions: From Rt 1, follow Rt 144 for 1/2 mile and turn onto the Chewonki (Neck) Rd. Turn into the airport entrance with the blue sign. The seminar is being held in the tan FBO building.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
