

## How the Grinch Stole Winter Flying

Winter in most parts of the United States can adversely affect flight operations. Poor weather conditions with fast moving fronts, strong and gusty winds, blowing and drifting snow, and icing conditions are just part of the conditions that require careful planning. This seminar is designed to refresh the pilot's memory in cold weather operations. Winter flying is not particularly hazardous if a pilot uses a little extra caution and exercises good judgment in analyzing the situation. Don't miss this important briefing! Click on the link below and register TODAY.

**Directions:** I-295 to Exit 10, Bucknam Road. Merge onto Bucknam Rd, then go 0.5 miles and take a left onto Middle Road. Go 0.4 miles to Activity Center on the right.

### A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
