

## Amateur-Built First Flight Consideration

It is not uncommon to hear of an accident occurring during the first few flights of an amateur-built aircraft. Often these accidents involve a lack of preparation and planning. Building an aircraft takes dedication, discipline, and attention to detail. Preparation for the first flight requires the same. Join aircraft builders Russ Keith and Charlie Gabelmann as they discuss the initial flight test phase of a newly built aircraft. Click on the link below and register TODAY.

**Directions:** Take I-95 to Exit 75. Turn right onto Washington Street. First right onto Kittyhawk Drive. Go approx. 1 mile and turn right onto Flight Line Drive. Follow to dead end. Terminal building is on the right.

### A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

### Event Details

**Wed, Mar 23, 2016 - 18:00 EDT**

**Airport Terminal Building**

81 Airport Drive

Auburn, ME 04210
