

178 Seconds to Live

A discussion about the 180 Degree Turn Experiment. Commissioned by AOPA in 1954, this experiment was carried out by the University of Illinois. It explores what to do first, and what not to do first when inadvertently entering IMC from VMC. As timely today as it was in 1954.

We will also be discussing the do's and don'ts of owner-performed maintenance.

FAA Safety Team Representative and Flight Instructor Byron Danforth will lead the discussion. Don't miss it! Click the link below and register TODAY.

Directions: I-95 to Augusta. Take Exit 109 and proceed westbound on Rte 202. Follow Rte 202 west to Rt 133 to East Livermore. Look for signs for airport.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
