

FAA Safety Team, Portland FSDO presents:

Fuel Awareness

Running out of fuel is one of the most preventable accident factors. But did you know that fuel exhaustion only accounts for a percentage of fuel accidents. Fuel starvation and fuel contamination are well-represented, as is misfueling (wrong grade or type) and operating on automotive fuel without a STC. FAA Safety Team Representative and former Aviation Safety Inspector (ret) Bob Dziadzio will speak about fuel exhaustion accidents, and techniques that pilots can use to keep fuel in the tanks and their options open.

NOTE: This event is open to members of the Civil Air Patrol only.

Directions: From Interstate 95 (Northbound or Southbound), take Exit 46. Turn right onto Jetport Road. Jetport Road then becomes Jetport Blvd. Jetport Blvd becomes Yellowbird Road. The Civil Air Patrol Building is toward the end of Yellowbird Road, past the Federal Express facility. It's the first driveway on the right after passing the FedEx facility.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
