

FAASTeam presents:

Unmanned Aerial Systems What Every Pilot Needs to Know

Our airspace is now shared by pilots of both manned and unmanned aircraft. Often, we don't understand enough about this new mix of aircraft operations. It is imperative that we all share a common understanding of how and why this blend works, and how to maintain and improve the impeccable safety record that general aviation has enjoyed for decades. This webinar is an important resource to get all pilots on the same page and will answer many of the misconceptions that we have about manned and unmanned operations.

Directions: This is a two-hour webinar starting at 7:00 PM EDT. Preregistration is required. To register, go to <https://wingsrealityedu.com/seminar-series/unmanned-aerial-systems/>. This event may be attended live on the WINGSReality EDU campus in Orono Maine or online via webinar. As usual, it is free to attend on campus. A small fee is charged for online access to offset the cost of presenting online. 200 seats are available online. 20 seats are available in the classroom on campus. Please make sure to register early whether attending online or in class so we know when the classroom is full. Thank you for joining us. Please visit the registration page to sign up for notices of upcoming monthly airman safety webinars.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
