

Come join us for an evening with FAASTeam Lead Rep, Michael Lessard.

Bringing local pilots and online pilots into the classroom as we present live from the WINGsReality EDU campus in Orono Maine.

Unmanned Aerial Systems – What Every Pilot Needs to Know

Our airspace is now shared by pilots of both manned and unmanned aircraft. Often, we don't understand enough about this new mix of aircraft operations. It is imperative that all pilots share a common understanding of how and why this blend works, and how to maintain and improve the impeccable safety record that general aviation has enjoyed for decades. This webinar is an important resource to get all pilots on the same page and will answer many of the misconceptions that we have about manned and unmanned operations.

As usual, lots of great homemade goodies, door prizes and socializing! So come out and be part of this fun and interesting evening. Free to attend on campus (limited seating). A charge of \$6.95 is required to attend online.

Tuesday, 30 May, 7:00 – 9:00 PM Eastern Time

Attend on campus at 20 Godfrey Drive, Orono ME or online at
