

Come join us for an evening with FAASTeam Lead Rep, Michael Lessard.

Bringing local pilots and online pilots into the classroom as we present live from the WINGsReality EDU campus in Orono Maine.

All New Non-towered Airport Ops for 2018!

In March of 2018, the FAA announced significant changes to the way we operate at non-towered airports. The new procedures call attention to regulatory requirements, recommended operations, and communication procedures. In this important webinar, we will brief you on traffic patterns, communications phraseology, and flight and ground operations involving aircraft, lighter-than-air aircraft, gliders, parachutes, rotorcraft, and ultralight vehicles. Although the new procedures primarily address Part 91 operators, this information is extremely valuable to UAS operators and all who operate on or in the vicinity of non-towered airports, and all should attend.

As usual, lots of great homemade goodies, door prizes and socializing! So come out and be part of this fun and interesting evening. Free to attend on campus (limited seating). A charge of \$6.95 is required to attend online.

Thursday, 28 June, 7:00 – 9:00 PM Eastern Time

Attend on campus at 20 Godfrey Drive, Orono ME or online at
