

Come join us for an evening with FAASTeam Lead Rep, Michael Lessard.

Bringing local pilots and online pilots into the classroom as we present live from the WINGsReality EDU campus in Orono Maine.

## Loss of Control – May the Force(s) be With You!

By virtue, the title of this webinar wishes one good luck, or success. As PIC, your prime task is to manage the forces of flight to maintain control of the aircraft. As so many have failed to do so, we now use an acronym (yes, another one!) to describe Loss of Control as an accident causal factor. LOC is the number one cause of fatal GA accidents, claiming 450 lives every year. LOC doesn't discriminate! It can happen to pilots at all experience levels and in any phase of flight. Join us to learn some excellent techniques to keep your forces "in the green"!

As usual, lots of great homemade goodies, door prizes and socializing! So come out and be part of this fun and interesting evening. Free to attend on campus (limited seating). A charge of \$6.95 is required to attend online.

Wednesday, 3 October, 7:00 – 9:00 PM Eastern Time  
Attend on campus at 20 Godfrey Drive, Orono ME or online at
