

Flying the Wind

What do you know about the effect that wind has on aircraft control? Have you ever questioned your abilities in a crosswind situation? Did you know that loss of control on the ground, which accounts for almost half of all loss of control accidents, is almost exclusively caused by a pilot's inability to correctly deal with a crosswind. Join us as Master Flight Instructor/Designated Pilot Examiner/FAASTeam Lead Rep Hobie Tomlinson discusses how to plan, prepare, mitigate, and deal with windy weather.

Directions: Williston Road to Valley Rd. At the end of the Valley Road, bear left and proceed to the yellow building.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
