

Flying Safely While Aging Gracefully

Although we don't like to admit it, there are physiological and cognitive changes that occur as we grow older? How do these changes affect our flying, and what can we do to stay safe as time marches forward? This seminar will provide insight into factors affecting older pilots and identify tips and techniques for accommodating these factors. Targeted to older pilots and all flight instructors, but useful for any pilot or anyone who accompanies older pilots.

Directions: Take I-95 to Exit 19. Go north on Rte 109 for 7.5 miles. Southern Maine Aviation will be on your left behind the Lucas Country Store (1.5 miles from the intersection of Rtes 4 & 109).
