

FAASTeam presents:

# **AMT Airworthiness Topic of the Quarter - First Flight Preparation After Maintenance**

In this webinar we'll look at two accidents caused by elevator rigging mistakes, which were exacerbated by both pilots failing to notice that a flight control was operating in reverse during the preflight inspection and pre-takeoff check. We'll discuss items you might recommend your customers add to their checklists after maintenance, as well as the suggestion that when preparing to fly for the first time after extensive aircraft maintenance the pilot needs to be very alert for oddities.
