

FAASTeam / Charlotte FSDO presents:

# On Top of the World!

Unlike any other form of flying, there's as much "art" to mountain flying as there is science. A person can learn the basic aspects of mountain flying relatively quickly, but old timer high-country pilots will tell you it takes a lifetime to truly be at home flying in the mountains. Attend this informative briefing and increase your knowledge of special operating procedures when conducting flight operations at high density altitude and mountain airports. You will learn some quick rules of thumb to calculate takeoff and landing distance and why we factor in additional runway requirements above the Pilot's Operating Handbook (POH) tables. Special emphasis on flying in the mountains of North Carolina. Whether you fly in the "Flat Country" or "High Country", don't miss this great seminar. Click on the link below and register TODAY!

**Directions:** Ashe County Airport.

**A message from the National FAASafety Team Manager**

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

## Event Details

**Sat, May 18, 2013 - 9:30 am**
