

A Modern Look at Avionics

Modern Avionics are sometimes a confusing and daunting aspect of flying and owning small aircraft. We will look at industry trends, things to look out for, and demystify technologies like ADS-B without a sales pitch. We'll examine training methodologies and explore practical ways to keep up with the fastest changing aspects of modern aviation. Join us for this important discussion.

Directions: Parking in front of Western North Carolina Aviation
Overflow parking in gravel lot diagonally across from the Western North Carolina Aviation.
If you fly in, park on the south ramp between taxiways Hotel and Kilo. Call 828 606 7142 for access through the pedestrian gate.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
